

MULTI-USE

TRANSFER PUMP

01082

Read this manual in full before using this product and retain it for future use. Always use the latest version of the manual; visit [drapertools.com/manuals](https://www.draper.com/manuals) for the latest release.

1. Health and Safety Instructions

- Keep hands clear of moving parts when the pump is in use.
- **ALWAYS** read and adhere to any safety information provided with any liquids to be transferred.
- **DO NOT** pump flammable liquids near sparks or open flames or allow them to splash onto hot surfaces.
- Clean the pump thoroughly after every use to prevent contamination.
- **DO NOT** over-inflate items with air.
- Wear appropriate PPE for the task to be performed.
- This product is **NOT** suitable for potable (consumable by humans) fluid applications.

2. What's in the Box?

- A. 1 x Pump
- B. 2 x Ø 12mm X 1,300mm fluid transfer hoses
- C. 1 x 400mm black air pressure hose
- D. 1 x Lock-on connector
- E. 1 x Needle valve adaptor
- F. 1 x Plastic valve adaptor

3. Siphon or Transfer of Fluids

1. Press and hold the upper INTAKE port connector inwards and insert a clear hose, then release the connector to lock it in place.
2. Attach the other clear hose to the OUTLET port in the same way.
3. Insert the INTAKE hose into the fluid to be transferred and the OUTLET hose into the destination reservoir.
Important: When siphoning fluid, the discharge point must be lower than the INTAKE hose.
4. Pump the handle several times until the fluid begins to flow, then leave the handle in the open position; the flow should continue automatically but can be accelerated by continued pumping.
5. To remove the hoses, press and hold the port connectors and detach the hoses from the ports.

4. Use as an Air Pump

1. Insert the serrated nozzle of the lock-on connector into the end of the black hose with the metal ring.
2. Press and hold the lower OUTLET port connector inwards and insert the bare end of the black hose, then release the connector to lock it in place.
3. Insert the appropriate adaptor squarely into the lock-on connector and fold down the lever to secure it.
4. Insert the adaptor into the valve of the inflatable and pump the handle to inflate.

5. Product Care and Disposal

- Flush the pump and the clear hoses with warm, clean water after every use.
- Clean the pump body with a damp cloth only; **DO NOT** use solvents or aggressive chemicals.
- Clear up spillages immediately and appropriately.
- If the pump lubricant begins to dry out, lift the handle to its highest position and spray a few drops of light oil into the INTAKE port, then pump the handle several times.
Important: **DO NOT** use penetrating oil.
- Store this product in a clean and dry environment, out of direct sunlight and out of reach of children.
- Dispose of waste fluids separately and in accordance with local regulations; **ALWAYS** read the label.
- Dispose of this product responsibly and in accordance with local regulations; recycle where possible.
